

ANNUAL REPORT OF 2016 DATA FOR
THE LOWER NIOBRARA NATURAL RESOURCES DISTRICT AND
NEBRASKA DEPARTMENT OF NATURAL RESOURCES
INTEGRATED MANAGEMENT PLAN

Prepared by the Nebraska Department of Natural Resources
For the Annual Meeting August 3, 2017

Introduction

The Lower Niobrara Resources District (LNNRD) and the Nebraska Department of Natural Resources (NeDNR) jointly adopted an Integrated Management Plan (IMP) which became effective on May 1, 2014, with the goal of jointly managing ground and surface water within the LNNRD to sustain a balance between water uses and supplies for the long term. The purpose of this report is to fulfill the Department of Natural Resource's responsibilities under the IMP annual reporting obligations and provide updates to current monitoring projects or studies as outlined in the IMP.

Reporting and exchanging information gathered from monitoring projects, streamflow data, or other studies provides a basis to increase understanding of the surface water and hydrologically connected groundwater system. The data gathered through the IMP's monitoring plan are designed to evaluate and measure the success of the objectives of the IMP. This information exchange also helps to test the validity of the conclusions and information upon which the IMP is based. This report contains information from January 1, 2016, through December 31, 2016.

Department Reporting: Data

The IMP requires that the Department annually report on the following water data within the District on an annual basis:

1. Streamflow measurements;
2. Surface water permits issued and/or denied;
3. Surface water usage data such as voluntary water use reports, flow meter data, crops irrigated, and acreage irrigated;
4. Groundwater transfers approved; and
5. Offsets provided for depletions resulting from increased consumptive use related to any of the above-listed items.

Details for each of these items are as follows.

1. Streamflow Measurements

The one-time streamflow measurements made by the Department's field office staff, in five locations, during 2016 are included in Table 1 below.

Table 1. Streamflow measurements taken by NeDNR staff in 2016

| ID | Date | Discharge (cfs) | Stream | Location |
|----|---------|-----------------|----------------------------|--|
| 1 | 3/22/16 | 16.10 | Ponca Creek | NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 21-34-12W |
| 2 | 7/20/16 | 0.34 | Willow Creek | NE $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 27-30-21W |
| 3 | 9/21/16 | 0.00 (Dry) | Meglin Creek | SE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 21-34-16W |
| 4 | 11/2/16 | 5.77 | Merriman Creek | SW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 24-29-7W |
| 5 | 11/2/16 | 0.30 | Tributary to Pischel Creek | NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 2-31-8W |

The locations of streamgages yielding streamflow measurements made within the LNNRD by USGS and the Department are shown in Figure 1. Daily streamflow measurements from these streamflow gages for calendar year 2016 are shown in Appendix 1. Also on Figure 1 are the streamgages that do not collect discharge data and the inactive gages that may have historical data. This streamflow data can be acquired from USGS's National Water Information System at <http://waterdata.usgs.gov/>.

Streamgage Locations within the Lower Niobrara Natural Resources District

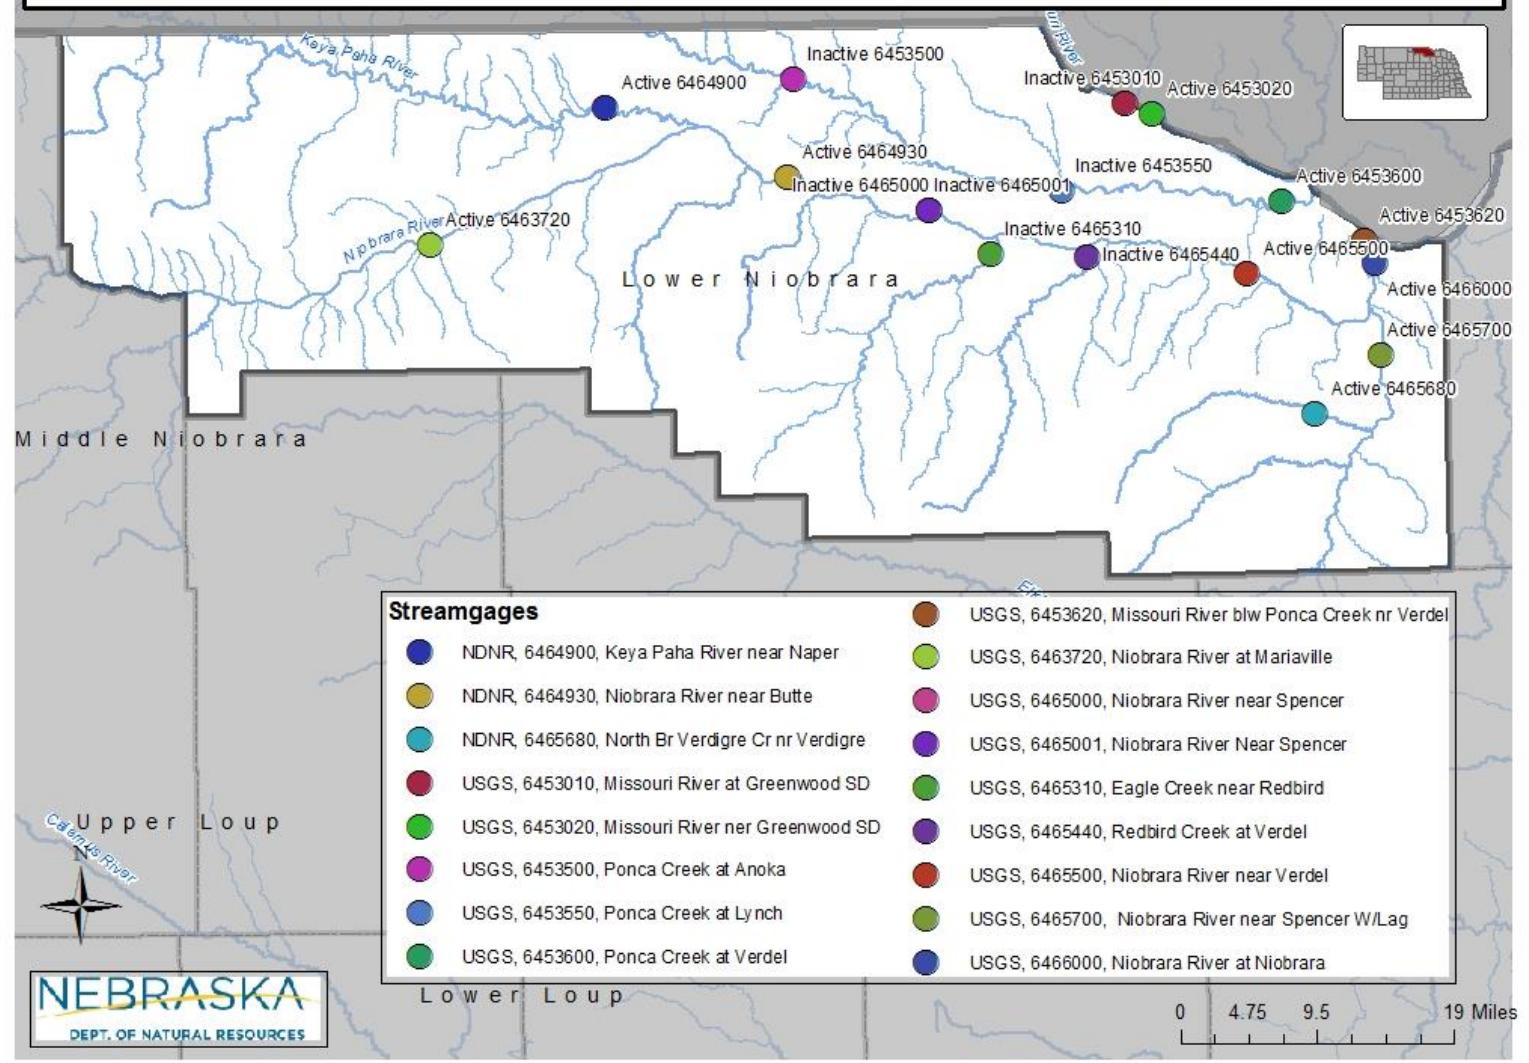

Figure 1. Streamgage locations within the Lower Niobrara NRD

2. Surface Water Permitting

In 2016, one application for a permit to appropriate surface water was approved by NeDNR, and is listed below in Table 2. No new surface water permits for irrigated acres were approved during 2016. The use of the water under the approved permit is to generate hydropower.

Table 2. Surface water applications approved in calendar year 2016 within the LNNRD

| Appropriation Number | Approval Date | S-T-RW | Status | Use | Acres | Grant in CFS | Number of New Irrigated Acres |
|----------------------|---------------|-----------|--------|-------|-------|--------------|-------------------------------|
| A-18503 | 7/28/2016 | 30-33-11W | Active | Power | - | 425 | 0 |

While the IMP does not specifically require the reporting of cancelled surface water appropriations (in-full or in-part), NeDNR is providing these data for a more complete picture of surface water permitting activities within the NRD. In 2016, five permits to irrigate using surface water from a flowing source (IR), two permits to irrigate using water stored in a reservoir (SO), one domestic-use permit (DO) and one permit to store water (ST) were cancelled in-full or in-part, as summarized in Table 3. One SO permit was dismissed. This results in a cancellation of 1,364.5 acres previously approved for irrigation purposes using surface water. The basis for the Department's action taken on each is listed below Table 3.

Table 3. Surface water appropriations cancelled or dismissed in 2016 in the LNNRD

| Appropriation Number | Cancellation Date | S-T-RW | Status | Use | Begin Acres | Cancelled Acres | Cancelled CFS | Cancelled AF | Reason for Department Action |
|----------------------|-------------------|-----------|--|-----|-------------|-----------------|---------------|--------------|------------------------------------|
| A-7047 | 8/8/2016 | 27-34-12W | Cancelled in Full | IR | 59.6 | 59.6 | 0.46 | - | See Item 1 below |
| A-7593 | 11/5/2016 | 20-33-8W | Cancelled in Full | IR | 37.0 | 37.0 | 0.26 | - | See Item 1 below |
| A-10837 | 8/8/2016 | 2-31-9W | Cancelled in Part REL-5695 REL-5711 | IR | 251.0 | 238.0 | 3.40 | - | See Item 3 below |
| A-10859 | 4/18/2016 | 11-34-13W | Cancelled in Part REL-5610 | IR | 90.9 | 5.8 | 0.08 | - | See Item 3 below |
| A-18419 | 5/19/2016 | 23-33-9W | Cancelled in Full | SO | 189.0 | 189.0 | - | 182.9 | See Item 2 below |
| A-18444R | 10/18/2016 | 8-33-15W | Cancelled in Full | IR | 829.0 | 829.0 | 11.84 | - | See Item 2 below |
| A-18840 | 10/18/2016 | 21-34-16W | Cancelled in Part | SO | 68.0 | 5.8 | - | 0 | See Item 2 below |
| A-19003 | 4/26/2016 | 1-30-8W | Cancelled in Full | ST | - | - | - | 14.75 | See Item 4 below |
| A-19004 | 4/28/2016 | 1-30-8W | Dismissed | SO | - | - | - | - | Due to the cancellation of A-19003 |
| A-19006 | 12/20/2016 | 2-31-8W | Cancelled in Part | DO | 2.0 | 0.3 | 0.01 | - | See Item 2 below |
| Totals | | | | | 1,526.5 | 1,364.5 | 16.05 | 197.65 | |

Basis for Department Actions

1. The Department found that the appropriation had not been used in the last five years, and the owner did not successfully contest the preliminary determination of nonuse.

Authority upon which the action was based: *Neb. Rev. Stat. §§ 46-229.02(1) through 46-229.02(6)*: If the Department makes a preliminary determination that an appropriation has not been used for more than five consecutive years, and the owner of said appropriation does not successfully contest the determination, the Department may cancel said appropriation in whole or part.

2. The Department found that the appropriator had not perfected their water right by beneficially applying the water in the time allowed.

Authority upon which the action was based: *Neb. Rev. Stat. §46-229.02(7)*: A water appropriation that has not been perfected pursuant to the terms of the permit may be canceled by the department without complying with sections 46-229.01 to 46-229.04 if the owner of such appropriation fails to comply with any of the conditions of approval in the permit, except that this subsection does not apply to appropriations to which subsection (2) of section 46-237 applies.

3. The owner signed and submitted a voluntary relinquishment-in-part of surface water appropriation.

Authority upon which the action was based: *Department Rules for Surface Water, Neb. Admin. Code. Title 457, Chapter 3*: Any appropriation, or part of any appropriation, may be voluntarily relinquished. The relinquishment shall be made on a form provided by the Department.

4. The appropriator failed to perfect the appropriation in the time allowed.

Authority upon which the action was based: *Neb. Rev. Stat. §46-229.02(7)*: A water appropriation that has not been perfected pursuant to the terms of the permit may be canceled by the department without complying with sections 46-229.01 to 46-229.04 if the owner of such appropriation fails to comply with any of the conditions of approval in the permit, except that this subsection does not apply to appropriations to which subsection (2) of section 46-237 applies.

3. Surface Water Usage Reporting

The Department received responses from 70 water users out of a possible 379, an 18% response rate, to its voluntary surface water use reporting program in 2016. A total of 6,957 acres were reported, categorized by irrigated vs. non-irrigated and crop type. This acreage is up from the 2015 reported 3,917 acres. In 2016, corn was grown on the greatest number of acres, with alfalfa second of the irrigated crops. The greatest number of acres of non-irrigated crops was in hay or forage, with millet second. The reported data is shown in Table 4.

Table 4. Voluntary surface water use reporting in 2016 in the LNNRD.

| Crop type | Total Reported Crop Acres | Crop Acres Irrigated | | Crop Acres Not Irrigated | |
|--------------------|---------------------------|----------------------|--|--------------------------|--|
| | | Acres | Percent of Reported Irrigated Acres (by Crop Type) | Acres | Percent of Reported Non-Irrigated Acres (by Crop Type) |
| Alfalfa | 1,465 | 1,187 | 23% | 278 | 16% |
| Corn | 2,493 | 2,468 | 48% | 25 | 2% |
| Forage Hay/Grazing | 1,516 | 431 | 8% | 1,085 | 61% |
| Millet | 341 | 0 | - | 341 | 19% |
| Other | 364 | 334 | 6% | 30 | 2% |
| Soybeans | 778 | 769 | 15% | 9 | <1% |
| Totals | 6,957 | 5,189 | 100% | 1,768 | 100% |

4. Groundwater Transfers

The Department did not act on any groundwater permit applications during 2016.

5. Offsets approved

No offsets were required in 2016.

Department Education and Outreach Activity in 2016

Each year, NeDNR dedicates a portion of staff time and resources to education and outreach efforts that promote a better understanding of integrated water management and why it is important to the state's citizens. NeDNR's outreach efforts range from informal conversations with local citizens about how we envision and strive for collaborative water management, to more complex presentations, discussions and demonstrations about the hydrologic connection between surface and groundwater.

In 2016, NeDNR staff attended the Sandhills Ranch Expo held in Bassett, Nebraska. This event provided many people who otherwise may not have had direct contact with NeDNR staff an opportunity to learn about NeDNR in general and the Water Planning Division's focus on integrated water management specifically. NeDNR staff operated a groundwater model showing the connection and interaction of surface water with groundwater, discussed IMPs, and fielded questions.

Many of NeDNR's efforts, such as hosting an informational booth at the Nebraska State Fair or improving the INSIGHT web portal, are broadly focused across the entire State and intended to provide all interested citizens with a better understanding of how integrated water management affects them. In 2016, NeDNR staff set up educational booths at the Nebraska State Fair, Husker Harvest Days, the Governor's Ag Conference, and the University of Nebraska-Lincoln's Women in Agriculture Conference. Improvements were also made to NeDNR's website (<https://dnr.nebraska.gov/>) and the INSIGHT web portal (<https://nednr.nebraska.gov/INSIGHT/>).

which will provide citizens with a more convenient and user friendly experience when they need to access water resources related information or data.
